

GL GAMMA BFC

Bushfire Compliant Roof Mounted Exhaust Fans

ELTA

BUSHFIRE CODE COMPLIANT

Ancillary Equipment

CBD - Backdraft shutter

Speed controllers

VA - Speed controller

SD - Star/Delta switch

VZ - Run-on timer

Description

The GL Gamma BFC, with bushfire code compliance, has been developed for bushfire prone regions. They feature a high performance backward-curved centrifugal fan and a robust galvanised steel construction.

There are 8 sizes in the range extending from 315 to 710mm diameter.

Typical Applications

Suitable for applications requiring the combination of speed-controllable motors with an all metal construction. Designed for use in commercial kitchen exhaust systems in bushfire prone areas.

Features

- Quick release toggle clamps provide easy access for cleaning and maintenance.
- Designed for vertical discharge applications.
- High quality bronze mesh provides ember protection.
- Speed-controllable with electronic or auto-transformer controllers (not on CE316VGL-BFC).
- Compact, low profile design.
- Choice of speeds available.
- High performance backward-curved centrifugal fan.
- Many 3-phase motors are 2-speed star/delta design.
- Can be mounted at angles up to 30°.
- Backdraft dampers are an optional extra.
- Compliant to AS3959:2009 up to and including BAL-40.

Construction

Cowls are of galvanised steel.

Ember protection - bronze mesh with maximum of 2mm aperture.

Backward-curved centrifugal impellers.

Powder-coating is an optional extra.

Motor

Type - external rotor, squirrel cage induction motors.

Electricity supply - 230V, single or 415V three-phase, 50Hz.

Ball Bearing - sealed for life.

Speed-controllable using electronic or auto-transformer speed controllers (not CE316VGL-BFC).

Many 3-phase motors are 2-speed star/delta design.

Internal Thermal Protection

All motors are fitted with Internal Thermal Contacts as standard.

Testing

Airflow to ISO5801:1997

Noise tests to BS848:Part 2, 1985

Additional Information

Construction of buildings in bushfire prone areas

AS3959:2009, clause 6.6.5(b) "Roof penetrations" states: Openings in vented roof lights, roof ventilators or vent pipes shall be fitted with ember guards made from a mesh or perforated sheet with a maximum aperture of 2mm, made of corrosion-resistant steel, bronze or aluminium.

Backdraft dampers

Backdraft shutters are an optional extra. The pressure loss across the shutter has to be added to the system pressure before making fan selections.

Kitchen Hood Exhaust Systems

AS/NZS1668.1:1998, Clause 11.2.5 states that, for commercial installations: "kitchen exhaust fan casings and cowls shall be manufactured from non-combustible materials that have a fusing temperature above 1000°C".

Suggested Specification

The roof ventilators shall be of the GL Gamma BFC with bushfire code compliance as designed and manufactured by Elta.

Impellers shall be of backward-curved centrifugal design and driven by speed-controllable external rotor motors with integral thermal protection.

They shall be constructed from galvanised steel and be of vertical exhaust design.

Ember protection mesh shall be bronze or steel with openings a maximum of 2mm. The windband shall incorporate quick-release toggle clamps to provide easy access for cleaning and maintenance.

All data shall be based on tests on a complete assembled unit to ISO5801:1997 for airflow and BS848:Part 2, 1985 for noise.

How To Order

Technical Data & Noise Levels

Electrical data in **bold** type refers to fans fitted with 2-speed star/delta motors as standard.

* Amperages shown are a guide only, refer to our Sales Department for accurate figures at time of order.

** Add the In-Duct Spectrum Corrections to the closest dB(A) level shown on the fan curve to obtain the In-Duct Sound Power Levels on the Inlet Side of the unit.

† The CE316VGL is not speed controllable.

Additional Information

Performance curves shown are based on nominal speeds.

As motor speeds may vary from one manufacturer to another, and from one motor type to another, variations in performance can result.
